

PALAX® MAINTENANCE SETS

Maintenance and wearing parts for Palax firewood processors are now available in economical machine specific sets. This allows you to easily obtain all the parts you need to service your machine, just by telling the machine model. Sets contain the most common maintenance and wearing parts, so you can ensure the flawless operation and performance of the machine. A maintained machine has a longer life cycle and a good resale value. In purchasing the maintenance set

you get all the parts you need at more economical price. Firewood processor conveyors also have their own maintenance series. The contents of the maintenance set are designed according to each individual Palax machine model. The sets assist through machine maintenance, with high quality parts, and guarantee carefree hours of machine use. Further information on the contents of machine specific sets can be obtained at sales@palax.fi.
